Charles N Wyble (aka @ReachableCEO)

Enterprise Technical Solutions Architect

Executive Summary

With 25+ years of enterprise infrastructure expertise, Charles N Wyble transforms businesses through comprehensive technical solutions spanning high-performance computing, enterprise security, large-scale infrastructure optimization, and advanced proprietary Claude AI implementation via The Wyble Method.

His proprietary Wyble Method delivers measurable outcomes across multiple domains—reducing documentation time by 80%, increasing development velocity by 70%, and decreasing technical debt by up to 90%—creating competitive advantages others simply cannot match.

He is located in the beautiful Austin TX metro area and is available for remote engagement world wide (and select on-site engagement in the USA)

Professional Highlights

Core Expertise

- **Enterprise Infrastructure Architecture:** Large-scale systems design & optimization
- **Advanced Claude AI Implementation:** Proprietary methodologies for business transformation
- **High-Performance Computing:** CUDA runtime implementation (bare metal, docker , k8s) & HPC management
- **Enterprise Security:** Comprehensive , multi layered, in-depth requirements gathering (not just “check the box” security compliance) and development of a right sized architecture and scaleable implementation over time.
- **Incident response :** Full service incident response/containment/mitigation and remediation.

Key Achievements

- **Disney:** Managed \$8 billion capital deployment with 86-day datacenter implementation
- **HostGator:** Reduced operational overhead by 60% through automation

- **TippingPoint:** Supported 50,000 daily CI/CD deployments with 99.99% reliability
 - **Evite:** Built email infrastructure handling 1M+ messages per minute
-

Business Impact Results

1. **Enterprise Infrastructure Optimization:** For a Fortune 100 client, Charles reduced physical/virtual/container/embedded appliance provisioning time by 95% and eliminated 80+ hours of weekly maintenance through a custom cloud orchestration system. This enabled teams to focus on revenue-generating activities instead of infrastructure management, resulting in \$5M annual operational savings.
 2. **AI-Powered Technical Documentation:** Charles transformed enterprise documentation systems using Claude AI for a stealth aerospace startup client, reducing update cycles from weeks to minutes while cutting maintenance costs by 95% and improving knowledge retention across technical and business teams, resulting in measurable improvements in both developer and end-user satisfaction.
-

The Wyble Method™ for Claude Implementation

A Proprietary Framework for Enterprise Business Transformation

The Wyble Method™ transforms how organizations leverage Claude AI technology through a structured approach that delivers measurable business outcomes:

Phase 1: Discovery & Strategy

- Claude-powered stakeholder interviews identify precise requirements with 70% greater accuracy
- Business objective mapping connects technical solutions to financial outcomes
- Opportunity assessment quantifies potential ROI across operations

Phase 2: Implementation & Integration

- Custom prompt engineering unlocks capabilities beyond typical use cases
- Seamless integration with existing workflows and systems
- Specialized training ensures teams maximize Claude's potential

Phase 3: Optimization & Scale

- Continuous refinement based on performance metrics
- Progressive expansion across business functions
- Proprietary SDLC integration for software development acceleration

Typical Business Outcomes

- 40% reduction in documentation time
- 70% increase in development velocity
- 90% improvement in requirements accuracy
- 95% decrease in rework and technical debt

“The Wyble Method doesn’t just implement Claude—it transforms how organizations operate, creating competitive advantages through AI that others simply cannot match.”

Service Offerings

Strategic Technical Consulting

Comprehensive enterprise infrastructure assessment, optimization planning, and implementation oversight to align technology with business objectives and maximize ROI.

Infrastructure Implementation & Migration

End-to-end execution of complex enterprise infrastructure projects with zero unplanned downtime, thorough knowledge transfer, and complete documentation.

Claude AI Business Integration

Transform operations through advanced Claude implementation using proprietary methodologies that unlock capabilities beyond typical use cases, tailored for enterprise environments.

Pricing & Engagement Options

Premium Service Tiers

Expertise Level	Delivery Format	Pricing	Ideal For
Enterprise Operations	Remote Consulting	\$150/hour	System optimization, infrastructure deployment
Specialized Solutions	Remote Consulting	\$250/hour	Bespoke architectures, Claude implementation
On-Site Expertise	In-Person	\$1,000/day*	Critical deployments, team training, strategic planning
Software Development	Project-Based	From \$10,000**	Custom solutions for truly bespoke business needs.

*Plus prepaid travel expenses

**\$5,000 due upon project initiation

Software Development Process

- **Initial Consultation:** (remote) \$2,500 (non refundable, not credited toward project upon engagement)

Delivery & Artifact Management

All engagements include (as standard) complete source code and documentation delivery to client.

Additional delivery options:

Artifact Service	Description	Price
Certified Destruction Upon Completion	Secure removal of all artifacts from ReachableCEO Enterprises systems after project handover	\$2,000 fee
Complete Transfer	Full knowledge transfer and ownership of artifacts to client (and certified artifact destruction)	Custom pricing based on scope starting at \$5,000.00

Flexible arrangements available for long-term engagements and retainer relationships

Value-First Approach

To ensure clients receive maximum value, initial engagements begin with Charles's proprietary Enterprise Assessment Framework, a comprehensive diagnostic process focused on understanding business objectives and technical environments.

This systematic approach typically reduces total project costs by 30% by:

- Identifying root causes rather than symptoms
 - Aligning technical solutions with business priorities
 - Establishing clear success metrics from the outset
 - Creating a prioritized roadmap for implementation
-
-

Technical Expertise Details

Enterprise Infrastructure & System Administration

- Large-scale systems architecture and administration
- Virtualization & storage solutions optimization
- Advanced security architecture & network design

Web & Application Technologies

- Enterprise deployment of 150+ FOSS business applications
- Cloudrion and Coolify management platforms integration
- Load balancing & web application security hardening

Specialized Technical Services

- High-performance computing & CUDA implementation
- Advanced Claude AI implementation & enterprise prompt engineering
- Infrastructure automation & orchestration for mission-critical systems

Take the Next Step

Ready to transform your enterprise with advanced Claude AI implementation or infrastructure optimization? Here's how to get started:

Book Your 60-Minute Strategic Assessment (\$75.00): Discuss your specific challenges and learn how The Wyble Method™ can address them.
