The Charles Wyble Show

early years

Tenant 1 - exclusive expert

the first time

become an exclusive expert at something. it's key.

from 14 to 18 years old i spent 10,000+ hours developing deep expertise in the microsoft file formats. excel specifically. i am a co-author of the only comprehensive documentation outside microsoft. i was the very first person to request the formats after the consent decree.

9/11/2001 was the first day of my senior high school year

less than a year later at 17 i was recruited by the department of defense to support global counter terrorism operations.

why? i was the worlds expert on microsoft file formats (specifically excel).

yes terrorists use excel. i supported sensitive site operations (SSE) pipelines that sourced, collected, processed, exploited intelligence in country to support industrial scale, stovepipe counter terrorism ops

the second time

I "helped people do stuff". We will simply say "offensive cyber" , but you know before 2010. No , it's not on my linkedin. Only people who are glorified metasploit operators put "NSA Cyber Ops" on linkedin. Because that's not useful OSINT for our enemies. I was there in the beginning and I was an early pioneer.

the third time

This little balloon project. It's nothing big and profesional like (insert co name here) #TODO , just some 30/40 somethings in a garage with a dream and a world class leadership/founding engineering team drawn from our mid career rolodexes and relentless pounding of the pavement.
